

Sprint 1 Report

Product Name: BB

Team Name: Team Rocket

Sprint Completion Date: October 21st, 2018

Revision Number: N/A

Revision Date: N/A

Actions to stop doing:

1. Team should stop merging their code into the master branch because the master should hold the final deployable app.
2. Team should stop merging their code without necessary pull requests, because team could get confused about what everyone has done so far.
3. Team should stop going outside the bounds of their self-assigned tasks, because team could get confused about what needs to be done and merge conflicts might arise.
4. Team should ensure all code is functional before pushing into shared remote branches.

Actions to start doing:

1. Team should start implementing a better merge system to ensure that everyone's code is up-to-date and reviewed before merging into branches that everyone is working on.
2. Team should start clearly defining tasks so that everyone is able to get a equivalent amount of work done.
3. Team should be more clear about their schedules so that a more effective meeting time can be found.

Actions to keep doing:

1. Team should continue communication, as it has been very helpful for the entire team to know what is going on during all the separate parts of the process.
2. Team should continue short SCRUM meetings 4 times a week because they are very helpful in making sure that everyone is on top of their specific parts, and everyone knows what everyone else is doing.
3. Team should continue weekly longer meetings to work together face to face on development.
4. Team should continue weekly meetings with the commissioner of the project to keep in touch with her vision of the product.

Work completed/not completed:

1. The team familiarized themselves with back and front end technologies necessary to develop a successful app, namely Swift and Firebase.
2. The users are able to create a unique account with all the information relevant to their work as a volunteer. The user can log in with their emails passwords authenticated.

Work completion rate:

Number of user stories completed: 2

Number of estimated ideal work hours: 15

Number of days: 5

User stories/day: 0.5

Ideal work hours/day: 3

Burnup chart:

Sprint 1 Burn-Up
