

Sprint 3 Report

Product Name: BB

Team Name: Team Rocket

Sprint Completion Date: November 18th, 2018

Revision Number: 1

Revision Date: 11/18/18

Actions to stop doing:

1. Team should stop putting work off until the last minute, because it leaves tasks unfinished to the point where they may not be completed by the end of the sprint.
2. Team should more clearly define and organize tasks during sprint planning and update the sprint plan if there are modifications needed to be implemented.

Actions to start doing:

1. Team should start reevaluating the sprint plan so that the tasks to do remain clear throughout the sprint.
2. Team should start going through the backlog as deployment nears so that the team has a working application at end.
3. Team should start integrating work more frequently in the sprint.

Actions to keep doing:

1. Team should continue communication, as it has been very helpful for the entire team to know what is going on during all the separate parts of the process.
2. Team should continue short SCRUM meetings 4 times a week because they are very helpful in making sure that everyone is on top of their specific parts, and everyone knows what everyone else is doing.
3. Team should continue weekly longer meetings to work together face to face on development.
4. Team should continue weekly meetings with the commissioner of the project to keep in touch with her vision of the product.
5. Team should continue working in person as it increases individual productivity

Work completed:

1. (Complete) As a developer, I want to finish the set up for 10to8 API integration so that we can pull presentation schedules from 10to8. (Later switched over to mock database with Firebase due to 10to8's API lacking needed functionality for our needs)
2. (Complete) As a college student presenter, I want to be able to access a basic integrated scheduling platform, so that I know when and where my next presentation will be.
3. Finish implementing a filter function (to get ALL presentations or JUST from one chapter) so users can view, based on their account type (back end): (7 hours)
 - a. (Incomplete) Management/Executives: All presentations from all chapters (Global Scope)

- b. (Complete) College presenters and outreach coordinators: All presentations from their own chapter OR just the presentations for one individual (Local Scope)
- 4. As a college student presenter, I want the scheduling logistics for my presentation (date, time, classroom #, etc) to be easily accessible because I often have multiple presentations in one day and need to know exactly where to go and when.
 - a. (Complete) Create detail view for any presentation that is clicked on (4 hours)
 - b. (Complete) Create UI form for presenters to add information about their presentation. (4 hours)
 - c. (Incomplete) Send all info from form to firebase
 - d. (Incomplete) Send all info from form to spreadsheet/csv

Work completion rate:

Number of user stories completed: 2 / 4

Number of estimated ideal work hours: 12 / person / week

Number of days: 5 / person / week

User stories/day: 0.275

Ideal work hours/day: 2
