

Release Plan
Boundless Brilliance Internal App
Team Rocket
BBv1
Release Date: 12/02/18
Revision Number: NA
Revision Date: NA

High Level Goals:

1. Be able to create a unique account and login to it.
2. Easily input all presentation data and direct the data to a shared Google spreadsheet that is compatible with Salesforce.
3. Have an integrated scheduling platform to be able to:
 - Schedule through the platform [10 to 8](#)
 - Receive notifications via Google Calendar
 - Access presentation details

User Stories for Release:

Sprint 1

1. (5) As a member of the organization, I want to be able to create an account where I can access the integrated scheduling platform and presentation data tracker.
2. (2) As a college student presenter, I want to be able to access a basic integrated scheduling platform, so that I know when and where my next presentation will be.
3. (2) As a college student presenter, I want to be able to access a basic presentation data tracker, so that I can update information regarding the presentation.

Sprint 2

4. (5) As a college student presenter, I want to log the information about my recent presentation on the go on my phone because I am busy and do not always have time to login to my computer and fill out all of the required items.
5. (6) As a college student presenter, I want the scheduling logistics for my presentation (date, time, classroom #, etc) to be easily accessible because I often have multiple presentations in one day and need to know exactly where to go and when.
6. (5) As a college student presenter, I would like reminders through the app so I never miss a presentation.

Sprint 3

7. (6) As the Executive Director, I want to view and maintain excellent records of all current Boundless Brilliance program operations so that the organization can provide donors and our board with the full picture of our impact.

8. (2) As the VP of Programs, I want to sort the presentation by college chapter so I can scale the organization appropriately.

Sprint 4

9. (6) As a college student presenter, I want to be able to take a picture of my reimbursement receipts and submit it when the rest of my presentation data.
10. (4) As a college student presenter, I want to be able to see my pending reimbursements and if they have been processed or not.
11. (4) As the VP of Development, I want to ensure that reimbursements are processed so that all of our student volunteers are paid back in a timely manner.

Product Backlog:

1. Easy connection to www.boundlessbrilliance.org. Ability to download the resources available on this website (note, there is currently no mobile site created. Site is created via Squarespace).
2. Thinktank. A space for volunteers to submit ideas, feedback, questions, and critiques. There could be a dropdown menu to direct the comments to the A) Executive Team and Regional Managers or B) College Chapter leadership
3. As a volunteer presenter, I want to be able to take notes for myself within the app in a separate location from where I submit my presentation data.
4. Presentation Anecdotes. We are collecting anecdotes from our presenters regarding their presentation experience. There should be a tool for them to input their stories, and then it can be compiled elsewhere.
5. Submit reimbursements. Able to take pictures of the receipts and log the date, how much was spent, and what the expense was. They should be able to see their pending reimbursements and if they have been processed or not. Reimbursements do not need to be connected to their presenters bank accounts, simply logged.
 - On the development team interface, there should be a list of reimbursements, labeled either pending or fulfilled, then a button for them to switch the reimbursement status.
4. Integrate slack or another messaging system??
5. Send notifications for weekly meetings, via google calendar.
